

PINCH SOLENOID VALVE 2/2 – NO (Normally open)

▶ GENERAL FEATURES

Pinch solenoid valve, suitable to shut off media without producing neither turbulent flows, nor dead spaces.

High flow rate under the same conditions of internal diameter of different solenoid valves; the system allows a bi-directional through flow. The valves are suitable for soft SILICONE tubings or others, similar as to elasticity and hardness (50 shore A).

The tubing is the only material in contact with the fluid. The tubings are not included in our supply.

▶ISTALLATION

Solenoid valve can be mounted in any position.

► MATERIALS

BodyAnodized aluminumPinching devicePOM (reinforced acetal copolymer)Internal componentsStainless steelCore tubeChemically nickel coated brass (Ni-P).

► COIL

Continuous duty ED 100%

Encapsulation material Insulation class F (155°C)

Ambient temperature FD 100%

PA (Polyamide) fiberglass reinforced F (155°C)

Electric connection

DIN 46340

Protection degree

DIN 46340

IP 40 (EN 60529) with female wire terminals 2,8x0,5

Voltages DC totally insulated

12-24V (+10% -5%)
(Other voltages on request)

TUBINGS		Tubing minimum wall	Pinching strength	Series and type		Power absorption	Notes	Weight	
I.D. (mm)	O.D. (mm)	thickness (mm)	(kg)	Valve	Coil	(W)	Notes	(kg)	
0,76	1,65	0,4	1,200	S204-04	ZE30A	4	-	0,050	
1,02	2,16	0,5	1,300	S204-05					
1,57	3,18	0,7	0,600	S204-06					
1,98		0,5	0,900	S204-07					

NOTE

- If the soft tubings are different from the ones indicated, it's important that the tubing minimum wall thickness is the same as shown in the table.
- For the use of a soft tubing with outside diameter smaller than 2,2mm it is necessary to install the tubing guide sleeve (drawing K29501).
- In case the tubing is not placed in its seat, the solenoid valve could operate incorrectly.
